Get your electronics identification labels from ONE2ID

Electronics manufacturing places special demands on PCB barcode labels. While some companies label circuit boards after soldering, most prefer to track their complete production process which means identification labels need to be applied before the high temperature soldering process.

Polyimide - Kapton® and other durable, yet cost-effective labels will withstand all rigorous PCB manufacturing processes including soldering and cleaning. All polyimide materials are REACH, RoHS, PFOS, WEEE and Halogen free.

Whether you apply labels by hand or by applicator, there is always a more efficient and cost effective solution for you available. Besides a broad offer of high temperature and ESD labels, various white and metalised polyesters for component and post process labelling are on stock.

Polyimide

Polyimide - Kapton® labels available in standard and custom sizes. 25µ and 50µ white polyimides in matte and gloss finish on stock.

Coloured materials

Polyimide in green or other colors for special projects. Black labels printed with a white ribbon will make products look exclusive.

ESD

ESD polyimide and -polyester labels avoid the risk of damaging components. ESD materials can save expensive product recalls.

Polyester

For post process identification and component labelling, matt and gloss polyesters are available in industry sizes.

Auto Apply

A broad range of sizes available in auto apply format. Auto apply materials have a certain stiffness and are cut perfectly to apply carefree.

Rating plate

A complete offer of polyester and vinyl labels for type- and rating plates. Silver polyesters and VOID labels are commonly used.

About ONE2ID

A market leader in the production of industrial labels and identification products, with more than 25 years of practical knowledge and experience in industrial labelling.

ONE2ID has a large variety of standard size

labels in stock and produces custom made solutions in blank as well as printed labels to suit customers needs.

Markets served are the electronics, electrical, logistics, laboratory, automotive and aerospace.

Other products from ONE2ID

- Colour coded labels
- Wrap around labels
- Heat shrink sleeves
- Cable tags
- Raised panel labels
- Polyimide labels
- White and silver polyester labels
- Clear laminate labels
- Destructible and VOID labels
- Warehouse & racking labels
- Magnetic labels
- Coloured vinyls
- Hang tags
- Paper labels
- Printing ribbons
- Printers
- Label design software
- Rewinders
