**Your distributor:**

## Get your industry identification labels from ONE2ID

When you are producing high quality products you want to reflect this quality in your rating plate, safety sign or identification label.

ONE2ID can supply all labels or tags which are resistant to your product environment for its complete lifetime. Whether you want it to be resistant to UV, chemicals, low- or high temperature, abrasion or mechanical impact.

Standard applications require our standard adhesives. If the surface is curved, powder coated, greasy or just difficult to stick a label on, ONE2ID uses special types of adhesive.

We have invested in the latest state of the art machinery and materials to accommodate our customer demands for faster delivery, higher quality and cost reductions on their identification products.

ONE2ID has a large offer of labels and tags available as part of our standard range of products. Other sizes, materials or pre-printed labels can be ordered upon request.

### Raised Labels

High profile label for cost effective and efficient in-house thermal transfer marking to replace conventional engraved plates.

### Print And Laminate Labels (PALLabels)

Pre-cut label and laminate for printing and perfect laminating using a folding system to survive the most difficult environments.

### Polyester - PP - PE - Paper

Continuous rolls or pre-cut labels for rating plates, safety signs and identification of machinery, products or components

### Tags

Tags to identify cables, cable bundles, hoses or pipes are available in various sizes, colours and materials.

### Pre-printed

In our production facility we can print any logo, colour or serialised bar code to your needs and application requirements.

### Printers - Software - Ribbon

All the right tools and support for maximum flexibility so you can print your high quality labels and tags as you need them.

## About ONE2ID

A market leader in the production of industrial labels and identification products, with more than 25 years of practical knowledge and experience in industrial labelling.

ONE2ID has a large variety of standard size

labels in stock and produces custom made solutions in blank as well as printed labels to suit customers needs.

Markets served are the electronics, electrical, logistics, laboratory, automotive and aerospace.
